WONDOBOT

WHAT IS WONDOBOT

WondoBot provides a platform on Discord for fans of the San Jose Earthquakes to predict outcomes of football games. This Discord bot awards points to users based on the accuracy of their predictions in comparison to actual game results. By integrating seamlessly with the San Jose Earthquakes Discord Server, this bot creates a centralized hub where fans can come together to discuss, speculate, and anticipate the outcomes of upcoming matches. Moreover, a list of users that have the highest score based on their prediction is displayed, and a lot more.

WHY DID WE MAKE THIS

- BIG fans of the San Jose Eathquakes Team
- Provide fans with a platform to predict the outcomes of a match
- No other bot focuses on this team
- Allow Discord users who are fans of the team to find information and interact all in one place
- Great opportunity to integrate into a working environment and API/data

FUNCTIONS

- Make predictions on the outcome of a match
- Earn points based on accuracy of a prediction
- A ranking system displaying the top predictors in the server
- Retrieve information on matches

FUTURE OF WONDOBOT?

- Use ML/AI to get historical head-to-head matches to help the player in making a guess
- Gets the standings of the season, highlighting the San Jose Earthquakes
- Get incoming and outgoing players depending on year
- A daily news command that grabs articles/information on the team

HOW WE MADE IT

- Node.js
- Javascript
- Discord.js
- Sequelize
- PostgreSQL
- Docker
- Football API
